### ***Oath/Declaration***

The oath/declaration has the following problems which lead to a rejection of claims 1-46 under 35 USC 251:

- 1) The oath must state "material to patentability".
- 2) The oath needs to specify whether the error is either more or less than applicant had a right to claim
- 3) There is no supplemental declaration with an updated "no deceptive intent statement" for any changes made to the patent subsequent to the first declaration.
- 4) The error is not recited in an acceptable way in the declaration, it should specify that the inclusion of "an articulation axis" in claim 1 is an error in that the limitation is not necessary for patentability. BUT since the "error" recited above is not capable of being fixed due to recapture considerations (see below) the reissue also cannot be allowed for this "error".

### **Rejections for Recapture**

- 5) Claims 43-46 are rejected for Recapture:

The "recapture rule," prevents a patentee from regaining, through a reissue patent, subject matter that the patentee surrendered in an effort to obtain allowance of claims in the patent sought to be reissued. *In re Clement*, 131 F.3d 1464, 1468, 45 USPQ2d 1161, 1164 (Fed. Cir. 1997).

*Clement* discusses a three-step test for analyzing recapture:

- Step 1 involves a determination of whether and in what aspect any claims sought to be reissued are broader than the patent claims.
- Step 2 involves a determination of whether the broader aspects of the reissue application claims relate to surrendered subject matter.

Step 3 is applied when the broadening relates to surrendered subject matter and involves a determination whether the surrendered subject matter has crept into the reissue application claim.

Substep (3): if the reissue claim is broader in some aspects, but narrower in others, then:

- (a) if the reissue claim is as broad as or broader in an aspect germane to a prior art rejection, but narrower in another aspect completely unrelated to the rejection, the recapture rule bars the claim;
- (b) if the reissue claim is narrower in an aspect germane to [a] prior art rejection, and broader in an aspect unrelated to the rejection, the recapture rule does not bar the claim, but other rejections are possible.

The Federal Circuit in *North American Container, Inc. v. Plastipak Packaging, Inc.*, 415 F.3d at 1350, 75 USPQ2d 1545 (Fed. Cir. 2005) further refined Substep (3)(a) of *Clement* to define "broader in an aspect germane to a prior art rejection" to mean broader with respect to a specific limitation

- (1) added to overcome prior art in prosecution of the application which matured into the patent sought to be reissued and
- (2) eliminated in the reissue application claims.

"Surrendered subject matter" is defined in connection with prosecution history estoppel in *Festo Corp. v. Shoketsu Kinzoku Kogyo Kabushiki Co.*, 535 U.S. 722, 733-34, 122 S. Ct. 1831, 1838, 62 USPQ2d 1705, 1710-11 (2002). A patentee's decision to narrow his claims through amendment "may be presumed to be a general disclaimer of the territory between the original claim and the amended claim." *Exhibit Supply*, 315 U.S., at 136-137, 62 S. Ct. 513. "...in determining whether 'surrender' of subject matter has occurred, the proper inquiry is whether an objective observer viewing the prosecution history would conclude that the purpose of the patentee's amendment or argument was to overcome prior art and secure the patent." *Kim v. ConAgra Foods, Inc.*, 465 F.3d 1312, 1323, 80 USPQ2d 1495, 1502 (Fed. Cir. 2006).

A further opinion, *Ex parte Eggert*, 67 USPQ2d 1716 (BPAI 2003),

issued by the Board of Appeals and Interferences as a precedential opinion, is also part of the recapture precedent applicable to proceedings before the United States Patent & Trademark Office (USPTO). *Eggert* was entered on May 29, 2003, prior to the Federal Circuit's *North American Container* decision. In *Eggert* the majority held that the surrendered subject matter was the rejected claim **only** rather than the amended portion of the issued claim.

A published precedential opinion of the Board is binding unless the views expressed in an opinion in support of the decision, among a number of things, are inconsistent with a decision of the Federal Circuit. In this case, the majority view in *Eggert* is believed to be inconsistent with the subsequent Federal Circuit decision in *North American Container* with respect to the principles governing application of Substep (3)(a) of *Clement*. See:

*Ex parte Franklin C. Bradshaw and Thomas L. Soderman*, (Appeal 2006-2744 Bd. Pat. App. & Int. July 19, 2007) (available in Application 09/664,794 and at

<http://www.uspto.gov/web/offices/dcom/bpai/its/fd062744.pdf>);

*Ex parte Raanan Liebermann*, (Appeal 2007-0012 Bd. Pat. App. & Int. May 2007) (available in Application 09/603,247 and at

<http://www.uspto.gov/web/offices/dcom/bpai/its/fd070012.pdf> );

*Ex parte Willibald Kraus* (Appeal 2005-0841 Bd. Pat. App. & Int. April 2005) (available in Application 08/230,083 and at

<http://www.uspto.gov/web/offices/dcom/bpai/its/fd050841.pdf> )

As set forth in the above BPAI decisions, based on *North American Container* and other court decisions, surrendered subject matter is considered the subject matter of an application claim which was amended or canceled and, on a limitation-by-limitation basis, the territory falling between the scope of

- (a) the application claim which was canceled or amended and
- (b) the patent claim which was ultimately issued.

Accordingly, the "surrendered subject matter" that may not be recaptured through reissue should *be presumed* to include subject matter broader than the patent claims in a manner directly related to

- (1) limitations added to the claims by amendment (either by amending an existing claim or canceling a claim and replacing it with a new claim with that limitation) to overcome a patentability rejection and
- (2) limitations argued to overcome a patentability rejection without amendment of a claim.

However, when reissue claims are narrower than the patent claims with respect to features other than the surrender generating feature, then the reissue claims may be materially narrowed relative to the claims prosecuted and issued in the patent, thereby avoiding the recapture rule.

As explained in *Hester Industries, Inc. v Stein, Inc.*, 142 F.3d 1472, 1480, 46 USPQ2d 1641, 1647 (Fed. Cir. 1998), the recapture rule is avoided when two conditions are satisfied. First, an aspect of the invention must have been overlooked (e.g., not claimed) during patent prosecution. Second, the reissue claim must have been materially narrowed with respect to this overlooked aspect of the invention.

In summary, the recapture rule is avoided if the reissue claim was materially narrowed in other respects compared to its broadening surrendered aspect. A reissue claim is materially narrowed and thus avoids the recapture rule when limited to aspects of the invention:

- (1) which had not been claimed and thus were overlooked during prosecution of the original patent application; and
- (2) which patentably distinguish over the prior art.

Claim 1 was amended in the patent and argued to be patentable because it had "an articulated frame...and draft tongue pivotally connected...about an articulation axis located forwardly of said tilt pivot axis". This has been largely eliminated or at least clearly broadened in claim 43 and is improper as noted above.
